1 Introduction

These Additional Regulatory Disclosures (the “Disclosures”) have been prepared in accordance with the requirements of Part Eight of the EU Regulation 575/2013 (Capital Requirements Regulation – “CRR”) and the Malta Financial Services Authority (“MFSA”) Banking Rule (“BR”) 07, ‘*Publication of Annual Report and Audited Financial Statements of Credit Institutions Authorised under the Maltese Banking Act (Cap. 371)*’.

Following an overall frequency assessment of all Pillar 3 disclosures, this quarterly Pillar 3 disclosures report provides principally an update to the risk weighted asset-related Pillar 3 disclosures which have a quarterly frequency assigned also in line with the recommendations provided by the European Banking Authority (“EBA”) in its ‘*Final Report on the Guidelines on disclosure requirements under Part Eight of Regulation (EU) No 575/2013*’ - EBA/GL/2016/11 version 2*.

These disclosures are in respect of MDB Group Limited (the “Regulatory Parent” or “MDB Holding”), and its subsidiaries, together referred to as the “Group” or “MDB Group”, which is supervised on a fully consolidated basis by the European Central Bank (“ECB”). The subsidiaries forming part of the Group include MeDirect Bank (Malta) plc (“MeDirect Malta”), that is the parent company of MeDirect Bank SA (“MeDirect Belgium”). MeDirect Belgium carries out all of the Group’s activities in Belgium.

MDB Holding’s subsidiary, MeDirect Malta has been authorised to waive its requirement to comply with Part Eight of the CRR on an individual basis, in terms of Article 6 (3) of the CRR. On the other hand MeDirect Belgium is exempt from full disclosure requirements laid down in Part Eight of the CRR, however being a significant subsidiary of an EU parent institution, it is subject to limited disclosure requirements in terms of Article 13 of the CRR on an annual basis.

Consistent with the banking regulations, these disclosures are not subject to external audit. These disclosures have been appropriately verified internally by the Group’s management.

2 Own funds

2.1 Total available capital

The Group adopts the appropriate processes to ensure that the minimum regulatory requirements are met at all times, through the assessment of its capital resources and requirements given current financial projections. The Group has a strong track record of robust capital ratios and is confident that it will be positioned to maintain its overall capital strength.

For regulatory purposes, the Group’s capital base is divided in two main categories, namely Common Equity Tier 1 (“CET1”) capital and Tier 2 capital.

2.1.1 Common Equity Tier 1 capital – composition

Common Equity Tier 1 capital includes:

- ordinary share capital;
- share premium;
- shareholders’ contribution;
- retained earnings;
- reserve for general banking risks;
- fair value reserve; and
- other regulatory adjustments relating to items that are included in equity but are treated differently for capital adequacy purposes including deductions relating to reserve for depositor compensation scheme and the carrying amounts of investments in subsidiaries that are not included in the regulatory consolidation and certain other regulatory items.

2.1 Total available capital – continued

2.1.2 Common Equity Tier 1 capital – terms and conditions

- i. Ordinary share capital includes equity instruments which fall under the definition of Article 28(1) of the CRR, '*Common Equity Tier 1 instruments*'. The holders of 'A' ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of MDB Holding. 'B' ordinary shareholders are not entitled to vote or to receive any dividends distributed.
- ii. Share premium reserve is made up of premium paid by shareholders in excess of the nominal value of the 'A' ordinary shares. This reserve can only be applied in the paying up of unissued shares to be issued to members of MDB Group as fully paid bonus shares.
- iii. Shareholders' contributions ("Contributions") are amounts granted by the shareholders to MDB Group whereby MDB Group has no obligation to bear any servicing cost or transfer any economic benefits of any kind to the contributor or any other person in return and has no obligation to repay the Contributions. These terms and conditions of such Contributions render this instrument equity in nature in accordance with the requirements of '*IAS 32: Financial Instruments – Presentation*'.
- iv. Retained earnings are the part of the distributable items as per the CRR Article (4)(1)(128) definition, which are amounts of the profits at the end of the last financial year plus any profits brought forward and reserves available for that purpose before distributions to holders of own funds instruments less any losses brought forward, profits which are non-distributable pursuant to provisions in legislation or the institution's bye-laws and sums placed to non-distributable reserves in accordance with applicable national law or the statutes of MDB Holding. The balance in this reserve is net of tax.

Subject to MDB Group's dividend policy, the directors of MDB Group, in the annual general meeting, may from time to time recommend dividends to be paid from the retained earnings of MDB Holding. Such dividends may be in the form of capitalisation of retained earnings to 'A' ordinary shares.

- v. Reserve for general banking risks – in accordance with BR 09, the Group has allocated from its retained earnings, to a non-distributable reserve, an amount equivalent to 2.5% of the regulatory allocation for positions on which a specific impairment provision has been attributed. Refer to Note 16 'Capital and reserves' to the MDB Group Limited financial statements for the financial year ended 31 March 2019.
- vi. The fair value reserve includes the cumulative net change in the fair value of available-for-sale ("AFS") investments, excluding impairment losses, until the investment is derecognised, net of deferred taxation. These relate to the AFS category of EU-endorsed IAS 39.

2.1.3 Tier 2 capital

Tier 2 capital consists of subordinated liabilities in issue, which rank after the claims of all depositors (including financial institutions) and all other creditors. As at 30 June 2019, subordinated liabilities included within Tier 2 capital comprised the following debt securities issued which are unsecured and in the event of the winding-up of the issuer, these are subordinated to the claims of depositors and all other creditors of the issuer:

- debt securities, bearing interest payable at 7.5%, repayable on 14 December 2019.
- debt securities, bearing interest payable at 6%, repayable on 28 November 2024, with a 28 November 2019 early redemption option held by the Group.

2 *Own Funds – continued*

2.1 *Total available capital - continued*

2.1.3 *Tier 2 capital*

- debt securities, bearing interest payable at 5%, repayable on 13 October 2027, with a 13 October 2022 early redemption option held by the Group.

2.2 *Own Funds – other disclosures*

The Group does not have items included in the 'Total capital' which have values differing from those reported within IFRS compliant Statement of Financial Position, with the exception of Subordinated liabilities included as part of Tier 2 capital, since these are amortised in line with Article 64 of the CRR.

Retained earnings form part of 'Own Funds' only if those profits have been verified by persons independent of the Group that are responsible for the auditing of the Group's financial statements and the Group has demonstrated to the satisfaction of the competent authority that any foreseeable charge or dividend has been deducted from the amount of those profits.

2.2.1 *Composition of Own Funds*

MDB Group Limited is the primary provider of equity capital to its subsidiaries. These investments are substantially funded through the issuance of equity, shareholder's contribution and by profit retention. As part of its capital management process, MDB Group Limited seeks to maintain a balance between the composition of its capital and its investment in subsidiaries. In line with the requirement of Article 436 of the CRR in accordance with directive 2013/36/EU, there is no current or foreseen impediment to MDB Group Limited's ability to provide funding for such investments. The ability of subsidiaries to pay dividends or advance monies to MDB Group Limited depends on, among other things, their respective local regulatory capital and banking requirements, exchange controls, statutory reserves, and financial and operating performance.

In December 2013 the European Commission published regulation (EU) No 1423/2013 being the '*Implementing Technical Standards with regard to Disclosure for Own Funds Requirements for institutions according to Regulation (EU) 575/2013 (CRR)*'. In order to increase transparency regarding the regulatory capital of European institutions the regulation provided a set of templates which will help to facilitate cross-jurisdictional comparisons.

2.2 **Own Funds – other disclosures - continued**

2.2.1 **Composition of Own Funds - continued**

As shown above, there were no other items requiring deduction that were not deducted from the own funds in accordance with Section 3, Chapter 2, Title I, Part Two of CRR. In particular, in terms of article 48 of CRR, the Group's deferred tax assets dependent on future profitability and arising from temporary differences did not exceed the 10% threshold and therefore were not required to be deducted from own funds. The Group does not have any systemic risk buffer as at 30 June 2019.

In line with Article 2 in the Commission Implementing Regulation (EU) No 1423/2013 and Part Eight Article 437 (1) of the CRR, the following is a full reconciliation of the Group's Own Funds items to the financial information as at 30 June 2019.

As laid down in Regulation (EU) 2017/2395, the Group has opted to apply the transitional arrangements laid down in the same regulation to mitigate the impact of the introduction of IFRS 9 on own funds. Thus, during the transitional period ending 31 March 2023, the Group will be adding back a proportion of:

- the Day 1 impact as a result of the introduction of IFRS 9, being the difference between IFRS 9 expected credit losses (“ECLs”) on 1 April 2018 and IAS 39 provisions determined at 31 March 2018; and
- on difference in the IFRS 9 ECLs determined at reporting date and the ECLs determined on ‘day 1’ of the introduction of IFRS 9 (being 1 April 2018 for the Group) for Stage 1 (12-months ECLs) and Stage 2 (lifetime ECLs) assets.

The factors used to adjust the above ECLs will decline across the transitional period, starting at 95% during the financial year ended 31 March 2019 to 25% in the final transitional financial year ended 31 March 2023. The above treatment is in accordance with the requirements laid down in paragraph 2 and paragraph 4 of Regulation (EU) 2017/2395.

As noted in template IFRS 9-FL, the impact of the transitional arrangement on the Group’s capital ratio as at 30 June 2019 amounted to 27 bps at the reporting period under review. This was a result of an add-back in capital of €6.1 million and an increase of €1.4 million in risk-weighted assets. Similarly, the Group’s leverage ratio is ‘overstated’ by 15 bps in view of the transitional arrangement applied.

Note (1): The subordinated loan capital in Tier 2 capital represents the subordinated unsecured bonds of MDB Group Limited. They are included as part of Tier II Capital as they fully qualify for the provisions listed under CRR (575/2013) Part Two, Title 1, Chapter 4, Article 63. Specifically they rank after the claim of all other creditors and are not to be repaid until all other debts outstanding at the time have been settled. As at 30 June 2019 the subordinated bonds listed above had a remaining maturity of more than 5 years and had all been fully paid up. The full value of these securities are included in the Group's Own Funds figure.

Note (2): Redemption of the subordinated loan capital shall take place on 13 October 2027, provided that in the event that a Regulatory Change Event occurs, the Group shall at its sole discretion but subject to the prior approval of the MFSA, have the option to redeem the subordinated loan capital in full prior to the scheduled redemption date.

3 Capital requirements

Capital requirements represent the amount of capital resources that a bank must hold as required by the regulator. In line with CRR, the Group continuously monitors its Common Equity Tier 1 capital.

The scope of permissible CRR approaches and those adopted by the Group are described below:

- **Credit risk** – The Group calculates its risk weighted credit risk exposure in accordance with the Standardised Approach, described in Chapter 2 of Title II of Part Three of the CRR. To calculate the risk-weighted exposure amounts, risk weights are applied based on the exposure class and the related credit quality. Credit quality may be determined by reference to the credit assessments of ECAs that have been determined as eligible by the EBA. In the Group's calculations, senior secured loans and other corporate credit exposures are assigned risk weights corresponding to unrated positions and for the remainder of its securities investment portfolio the Group has nominated well-known risk rating agencies such as Fitch, Standard and Poor's and Moody's. Accordingly, the Group complies with the standard association of the external ratings of ECAs with the credit quality steps prescribed in CRR.
- **Operational risk** – The Group calculates its capital requirement using the Basic Indicator Approach, in terms of Article 315 of the CRR. The own funds requirement amounts to 15% of the average three years of the relevant indicator, as defined in Article 316 of the CRR. Elements within the relevant indicator include interest receivable and similar income, interest payable and similar charges, income from shares and other variable/fixed-yield securities, commissions and fees receivable/payable, net profit or net loss on financial operations and other operating income, adjusted for, amongst others stipulated in the CRR, profits on sale of non-trading book items and extraordinary or irregular items.
- **Counterparty credit risk** – The Group adopted the mark-to-market method in order to determine the potential future credit exposure, in line with Article 274 of the CRR, primarily on its derivative exposures.
- **Foreign exchange risk** – The Group has adopted the basic method to determine its foreign exchange risk requirement in accordance with Article 351 of the CRR. In terms of this Article, the Group does not calculate the capital requirement for foreign exchange risk as its net foreign exchange position is less than 2% of its own funds.
- **Credit valuation adjustment risk** – The Group uses the standardised approach, as per Article 384 of the CRR.

3 Capital requirements - continued

The following table provides an overview of the total RWA and the capital requirement for credit risk split by the different exposure classes as well as capital for operational risk, foreign exchange risk and credit valuation adjustment risk. No capital is allocated for market risk as the Group does not operate a trading book. The Group has no on-balance sheet exposures in items representing securitisation positions as the exposures below relate to off-balance sheet exposures to traditional wholesale securitisation positions in the banking book, where the Group acts as an investor, in respect of which the risk weighted assets are determined in accordance with the new securitisation framework that has been introduced through amendments to the CRR and the introduction of a new Securitisation Regulation. Moreover, the capital allocated to settlement risk and commodities risk is nought. The exposure value is equal to the total on-balance sheet and off-balance sheet net of value adjustments and provisions and post CCF:

4 Liquidity

In accordance with paragraph 16 of the EBA *'Guidelines on LCR disclosure to complement the disclosure of liquidity risk management under Article 435 of Regulation (EU) No 575/2013'*, the Group is required to disclose information on other items termed as 'prone to rapid changes, which guidelines identifies the following:

- total adjusted value of the Liquidity Buffer, as set out in row 21 of the LCR template in Annex II;
- total adjusted value of Total Net Cash Outflows, as set out in row 22 of the LCR template in Annex II;
- total adjusted value of the Liquidity Coverage Ratio (%), as set out in row 23 of the LCR template in Annex II.

These items have been disclosed in the table below:

		Total weighted value (average)			
Quarter ending on:		Apr – Jun 2019	Jan – Mar 2019	Oct – Dec 2018	Jul – Sep 2018

23	Liquidity coverage ratio (%)	501%	514%	553%	603%

5 Asset encumbrance

The disclosure on asset encumbrance is a requirement introduced in BR 07 transposing the provisions of the EBA *'Guidelines on disclosure of encumbered and unencumbered assets'* (EBA/GL/2014/03).

The objective of this disclosure is to facilitate an understanding of available and unrestricted assets that could be used to support potential future funding and collateral needs. An asset is defined as encumbered if it has been pledged as collateral against an existing liability, and as a result is no longer available to the group to secure funding, satisfy collateral needs or be sold to reduce the funding requirement.

The disclosure is not designed to identify assets which would be available to meet the claims of creditors or to predict assets that would be available to creditors in the event of a resolution or bankruptcy.

As stated in paragraph 24 of the EBA *'Guidelines on materiality, proprietary and confidentiality and on disclosure frequency under Articles 432(1), 432(2) and 433 of Regulation (EU) No 575/2013'*, "institutions should provide additional interim information to those listed in paragraph 23 when the result of their assessment for the need to provide disclosures in Part Eight of Regulation (EU) No 575/2013 more frequently than annually shows that this additional information is necessary to convey their comprehensive risk profile to market participants".

In this respect, the Group believes that an analysis of asset encumbrance is critical to assess the ability of the Group to handle funding stress, and its ability to switch from unsecured to secured funding under stressed conditions. Thus, the following disclosures on asset encumbrance below have been prepared as part of this Pillar 3 quarterly report.

5 *Asset encumbrance - continued*

Encumbered and unencumbered assets

		At 30 June 2019			
		Carrying amount of encumbered assets €000	Fair value of encumbered assets €000	Carrying amount of unencumbered assets €000	Fair value of unencumbered assets €000
010	Assets of the reporting institution¹	275,411		2,503,910	
040	Debt securities	214,164	214,164	410,910	410,910
050	of which: covered bonds	202,493	202,493	118,751	118,751
060	of which: issued by general governments	10,685	10,685	181,244	181,244
080	of which: issued by financial corporations	202,493	202,493	233,650	233,650
090	of which: issued by non-financial corporations	-	-	459	459
120	Other assets	56,814		2,095,295	

The amounts disclosed in the above table represent the median values, being the rolling quarterly medians over the previous twelve months, determined by interpolation, in accordance with the Draft Regulatory Technical Standards on disclosure of encumbered and unencumbered assets under Article 443 of the CRR issued in March 2017.

The encumbered assets consist of investments used for repo funding and pledged securities. There are no encumbered assets held between entities of the Group and no over-collateralisation. Repoed transactions are covered by a Global Repurchase Master Agreement (“GRMA”) and involve the sale of financial assets with a simultaneous agreement to repurchase at a pre-determined price at a future date. The pledged securities transactions are pledged in favour of the ECB for the purposes of existing and potential long term re-financing operations and also in favour of the depositor compensation scheme.

The unencumbered assets disclosed in the preceding table under item ‘Other assets’ include loans and advances, cash and short term funds, property, plant and equipment, tax assets and other assets.

The Group continues to recognise encumbered assets since all the risks and rewards of the assets will be substantially retained in a manner that does not result in the encumbered assets being derecognised for accounting purposes.

The Group does not encumber any of the collateral received or any of its own debt securities issued.

At 30 June 2019	Matching liabilities, contingent liabilities or securities lent €000	Assets, collateral received and own debt securities issued other than covered bonds and ABSs encumbered €000
010 Carrying amount of selected financial liabilities	206,812	256,321

¹ The terminology “reporting institution” is referring to MDB Group Limited.

6 Leverage

The CRR requires financial institutions to calculate a non-risk based leverage ratio, to supplement risk-based capital requirements. The leverage ratio measures the relationship between the capital resources of the organisation and its total assets. The leverage ratio is a regulatory supervisory tool for the Regulator, to constrain the build-up of excessive leverage – one of the drivers of the banking crisis – previously not captured within Basel II.

The leverage ratio is calculated by taking capital as a proportion of total exposures at the end of each quarter. Capital is defined as Tier 1 capital in line with Article 25 of the CRR, whilst total exposure relates to the total on and off-balance sheet exposures, less deductions applied to Tier 1 capital.

The initial implementation of the current leverage ratio regime is to be effected as a Pillar II measure. In 2016, the EBA published its report on the impact assessment and calibration of the leverage ratio, recommending the introduction of a leverage ratio minimum requirement in the EU to mitigate the risk of excessive leverage. The analysis suggests that the potential impact of introducing a Pillar I leverage ratio requirement of 3% on the provision of financing by credit institutions would be relatively moderate, while, overall, it should lead to more stable credit institutions. It is expected that the leverage ratio should be introduced as a binding measure as of 2018. The current proposed CRD V package will introduce a binding 3% leverage ratio and in fact the EBA is assessing the impact of the leverage ratio as a binding measure at 3%.

The following table provides a summary of the Group's leverage ratio calculation as at 30 June 2019, determined in accordance with the requirements stipulated by Implementing Regulation (EU) 2016/200.

LRCOM: Leverage ratio common disclosure

As at 30 June 2019		€000
On-balance sheet exposures (excluding derivatives and SFTs)		
1	On-balance sheet items (excluding derivatives and SFTs)	2,948,151

LRQua: Leverage ratio disclosure of qualitative items

The leverage multiple has decreased by 54 bps from 31 March 2019. This decrease is mainly attributable to the larger increase in the leverage ratio exposure when compared to the Group's capital base.

The Group's leverage is managed as part of its risk appetite framework and monitored using a leverage ratio metric within the risk appetite statement set by the Group. The risk appetite statement stipulates the level and types of risk that the Group is willing to accept in its business activities. The leverage ratio is reported to the Group's Board and ExCo on a regular basis.

7 Disclosure references

The 'Guidelines on disclosure requirements under Part Eight of Regulation (EU) No 575/2013 – EBA/GL/2016/11' state that institutions required to comply with the obligations specified in Part Eight of the CRR and identified as G-SIIs or as O-SIIs or within the scope of application of the EBA Guidelines 2016/11 should pay particular attention to the possible need to provide more frequently than annually:
